END OF SEPTEMBER 2021 REPORT

During the month of September we managed to do the following home visits and activities.

Number of homes visited 70

Number of activities 02

Week 1

During this week we conducted a very big activity of food distribution to 59 children living with disabilities. The impact of lockdown is being felt by every section of the public, but particularly even more so by vulnerable groups such as people with disabilities. Persons with disabilities in Uganda, expresses great concern that COVID-19 will have a disproportionate burden on the lives of persons with disabilities in Uganda. The impact of coronavirus pandemic is lethal to children living with disabilities, who are the most vulnerable people. In their daily lives, they depend on third parties, such as helpers and guides, who find it hard to feed them in this period. Children with disabilities are at increased risk of developing more severe symptoms and dying due to weakened immune system due to poor feeding. Yawe foundation took a step ahead to support 59 kids living with disabilities enrolled in our community home-based health care program with relief food packages containing essential needs such as posho, sugar, rice, cooking oil and salt. This activity took 3 days and caregivers and their kids expressed maximum happiness towards this generous contribution from Bildhelf A Germany foundation based in Humberg.

Week 2

During this week we visited 05 clients and among the stories was of Nancy who was found home sitting. Nancy reported to have been ill for the last 2 weeks of malaria which was treated and now was getting better. We did passive stretches of the upper and lower limbs by flexing the muscles. Nancy reported how she feels improvement in the lower limbs. She can walk 2 meters without a crutch. The maid is also doing a good job in practicing with her daily.

In the same week we visited Cathy. Cathy was found home playing with Simon. We delivered Cathy's modified Cerebral Palsy chair. Cathy attained good sitting balance but has been lacking a better seat. This chair can be adjusted as she grows taller. It has 3 levels to adjust to. Cathy was so happy upon getting her chair. For now she will no longer have seat problems.

3 week

In this week we hosted Kabarole NGOs and CBOs Association thematic leaders meeting. KANCA is a network mobilizing all Non-Governmental organizations and Community based Organizations for improved services in the area of advocacy, capacity building, service delivery, governance and human rights. It came up with 5 thematic areas of Health water and sanitation, Special interest groups, Governance, Education and Agriculture. The leaders of the mentioned thematic groups convened at Yawe to discuss key issues presented in the draft report to be shared with different stake holders. It was an enriching and exciting visit to see member organizations getting to know what Yawe really does and discuss further about the future of KANCA especially that now is rebranding. It was an honor to see our Yawe bakery preparing for them breakfast with tea escorts of our very products.

Week 4

During this week the catching story was of Timothy whose goat gave birth and the family has taken good care of the project. Timothy was found in good condition whereby we did occupational therapy and was a bit slow however he was able to put on smiles and could laugh. Timothy's goat would be ready to be taken to another person in December. His mother reported relief for some weeks to see his child in such a good condition.

CLINIC MONTHLY REPORT

Reporting Period: SEPTEMBER 2021

1. PREVENTION OF HIV

Table I: Number of clients who received condoms:

No	VENUE	Target	Actual performance		
			Male	Female	Total
	centre	200	80	00	80

350 condoms were supplied among men and were provided with knowledge about effective use of condom. And female clients didn't consent for the female condom.

Table II: Number of clients given HIV testing services:

No	Venue	Target	Actual Performance		
			Male	Female	Total
1.	Centre	50	15	19	34
2.	Outreach	100	00	00	00
	TOTAL	150	15	19	34

34 clients were tested for HIV and 1 tested positive and adequate information was given about HIV treatment and management, and 1 positive client was initiated into care. And we didn't have any HIV community outreach due to covid 19 restrictions.

Number of clients tested for Syphilis:

No	Venue	Target	Actual Performance		
			Male	Female	Total
1.	Centre	50	01	00	01
2.	Outreach	00	00	00	00
	TOTAL	50	01	00	01

Comment:

1 clients were tested for RPR and all tested negative ,counseling was given.

Number of clients given malaria testing services:

No	Venue	Target	Actual Performance		
			Male	Female	Total
1.	Centre	50	03	02	05
2.	Outreach	50	00	00	00
	Total	100	03	02	05

Comment:

05 clients were tested for malaria and 1 were found positive counseling, preventive measures and treatment was given.

Number of clients tested for blood sugar:

No	Venue	Target	Actual Performance		
			Male	Female	Total
1.	Centre	50	03	05	08
2.	Outreach	100	00	00	00
	total	150	03	05	08

Comment:

8 clients were tested for RBs and most of them were clients who come for frequent check up, treatment and counseling done about diet.

Number of clients tested for Typhoid:

No	Venue	Target	Actual Performance		
			Male	Female	Total
1.	Centre	20	03	05	08
2.	Outreach	00	00	00	00
	total	20	03	05	08

Comment

8 clients were tested and all turned negative

Immunization table for children

Vaccine	Female	Male	Total

			Male	Female	Total
	Centre	10	03	03	06
	outreach	10	00	00	00

Comment

We got some referrals in from other facilities

VOCATION REPORT FOR THE MONTH OF SEPTEMBER 2021

During the month of September, vocational training program moved on well in all two trades (tailoring, hairdressing) with enrolled of 11 trainees (6 tailoring, 5 hairdressing) as they look forward to end the course in August. As Yawe foundation we were entitled to train these trainees for 6 months as we prepare them to qualify to do modular assessment given by Directorate of industrial training under MOES.

Beside training youth at our centre, we partner with other workshops in town to make sure that we give them skills that we are currently not offering at our centre, especially in welding, mechanics, carpentry and joinery.

As students look forward to end their course in during the coming month, we have registered 15 students for DIT exams. Since we had little number of students to sit the final exams, we have collaborated with other training institutions that don't have assessment centre to bring trainees to do exams from our centre.

In addition different tasks/tests to trainees have are ongoing as the final touches for students to be evaluated by DIT according to their competences and skills.

On a good note, we opened up a show room on the social enterprise centre as one way of promoting our products and learn new fashions on market.

Although the Government banned gathering and limited it was restricted to 20 people as one way of controlling the spread of Covid 19. We have tried to observe the SOPs by encouraging trainees to wear masks, wash hands, and keep social distance among others.

	DIT Registration		
Trade	Boys	Girls	Total
Tailoring	00	08	08
Hairdressing	00	05	05
knitting	00	02	02
total			15

New enrollment

Trade	Boys	Girls	Total
Hairdressing	00	01	01
computer	00	03	03
total			04

Good practices

1. Resume of life skills every Friday student.
2. Registration for students for DIT exams
3. Evaluation exams/test successfully done.
4. We have engaged different partners to support students in trainings
5. Cooperation among teachers.
6. Students observing Covid SOPs is well maintained.

Way forward

- Encouraging the trainees to caregivers to provide training materials to the trainees.
- Encouraging trainee and teachers to come in time.

Trainees during class time
